

Simple Instructions: How to embed a YouTube video into Puentes

Step 1 of 4 - Find your YouTube video

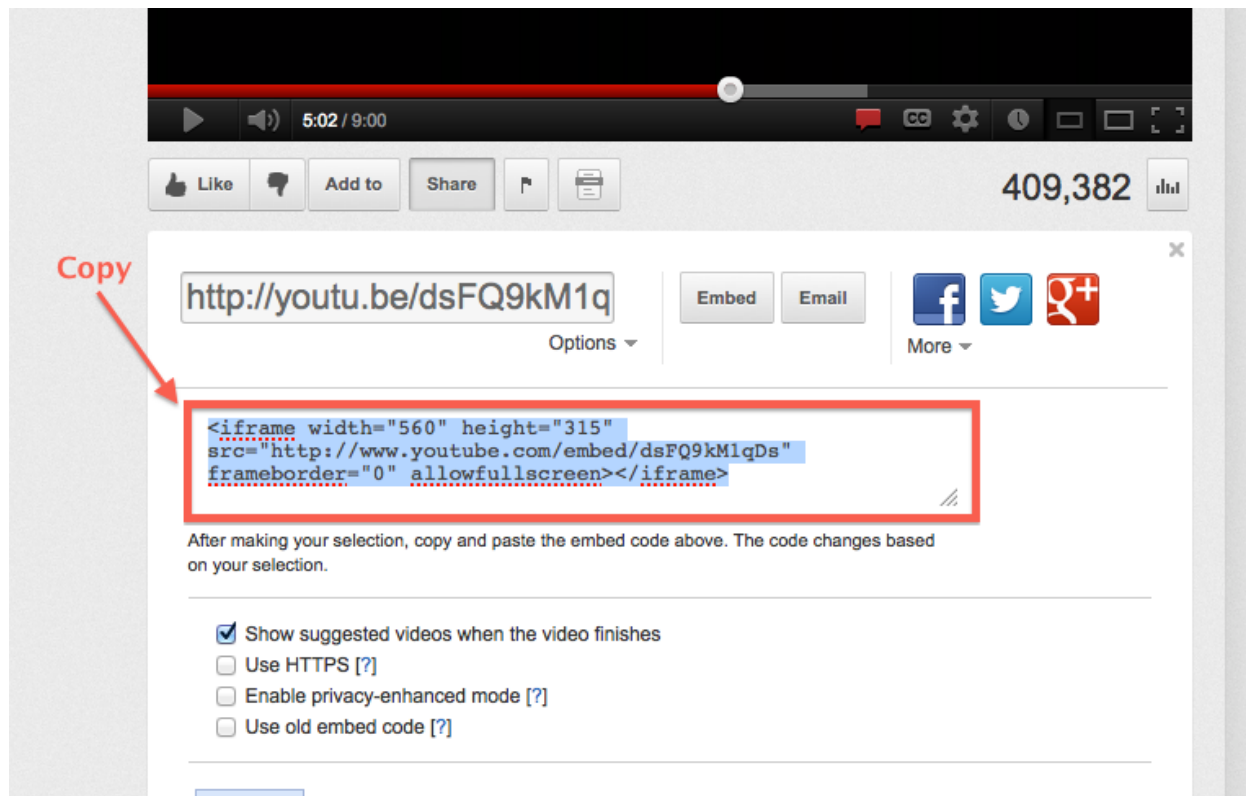

- Navigate to www.youtube.com and find a video that best suites your assignment.
- Open the video
- Below the video, click on the button **Share**

Step 2 of 4 - Click Embed

- After you click Share, you will see another window open with a YouTube link. This is the link to the website. However, what you want, is access to the code.
- Click on **Embed**

Step 3 of 4 - Copy the code

a. A second window opens and has a snippet of code. You want your students to view the assignment in the Puentes application, right? This is the code that will allow that.

b. Copy this code

- Windows: Press Control + C
- Mac: Press Command + C
- With a mouse: Right click, select Copy

Step 4 of 4: Paste that code back into Puentes

The screenshot shows the 'Challenge Information' form in the Puentes application. The form is titled 'Challenge Information' and includes the following fields:

- Name of Challenge:** A text input field containing 'YouTube example'.
- Due Date 1:** A date picker showing '2012-09-18'.
- Due Date 2:** A date picker showing '2012-09-19'.
- Due Date 1 Time Deadline:** A time picker showing '08 : 00 PM'.
- Due Date 2 Time Deadline:** A time picker showing '08 : 00 PM'.
- Video Embed Code:** A large text area for pasting the video code, which is highlighted with a red box. A red arrow labeled 'Paste' points to this area.
- Write the questions for your Assignment here:** A text area for adding assignment questions.

The left sidebar contains navigation links: Challenges, Assignment, Collaborate, Information (selected), and Send to Class. The top navigation bar shows the user's name 'Sean Daly' and links for Home, My Account, and Logout.

- Navigate back to the Puentes application
- Paste the code into the blank space
 - Windows: Press Control + C
 - Mac: Press Command + C
 - With a mouse: Right click, select Paste

--

Voilà! Your video has been added to your Bridge. Simply continue with the next part of the Information section, then click Save & Next to continue to Send to Class.
